

Videoscope K 12101

#### INRODUCTION

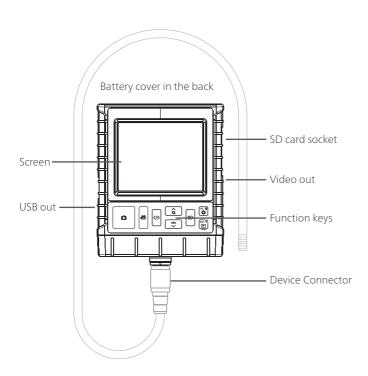

This videoscope with it's compact design and 3.5 inch screen is a perfect help in any workshop when inspecting areas that normally are hidden for the eye. Read through this manual to learn about the features of this videoscope and how to maximize it's benefits in your daily work.

#### SAFETY AND PRECAUTION

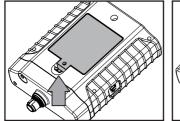

- To avoid danger, do not insert the probe into any area containing flamable liquid or gas such as fuel tanks.
- The rubber cover over the sockets for USB and SD card shall always be kept closed to avoid obstructive dirt from entering the instrument.
- In order to avoid damage to the probe, never bend it more than 180° and try to make bending arcs as large as possible.
- This product is designed for industrial use only. Never use the system for human or any other biological inspection.
- Do not remove the SD card when capturing photos and videos. This will cause a loss of information and the risk of damaging the SD card.
- Video recording requires an SD card with fast writing speed. We recommend 80X or more for better video quality.
- Use the cleaning set included at the delivery or other non alcoholic cleaning liquid.
- Please use only recommended component or accessories. Unapproved accessories and components may cause damage.

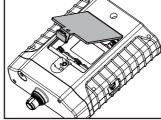

# **PRODUCT SPECIFICATION**
