

Scopebox

for X-431 EURO TAB

Features & Technical Data

- Record and save waveforms
- Print stored waveforms
- Extensive library of known good waveforms
- Waveform auto set up on all 4 channels
- Independent ground on each channel – allows for clean signal without interference or potentially damaging feedback
- Including ignition set-up pre-selects
- Ultra-fast capture of “glitch” occurrences with advanced triggers
- Built-in square wave signal generator ensures verification of accuracy & calibration
- Playback of waveform can be slowed down for observation and analysis
- Highest sampling rate in the industry to capture the smallest possible glitch:
Four channel: up to 200 MHz; single channel: 50 MHz
- Bandwidth: 20 MHz
- DC accuracy: $\pm 1\%$
- Plug & Play: Software comes pre-loaded – nothing to install!
- Connects via USB
- Easy to use intuitive interface
- High quality twist & lock BNC connectors
- Including an array of conventional ignition adaptors
- Including storage box and a comprehensive range of accessories
